## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

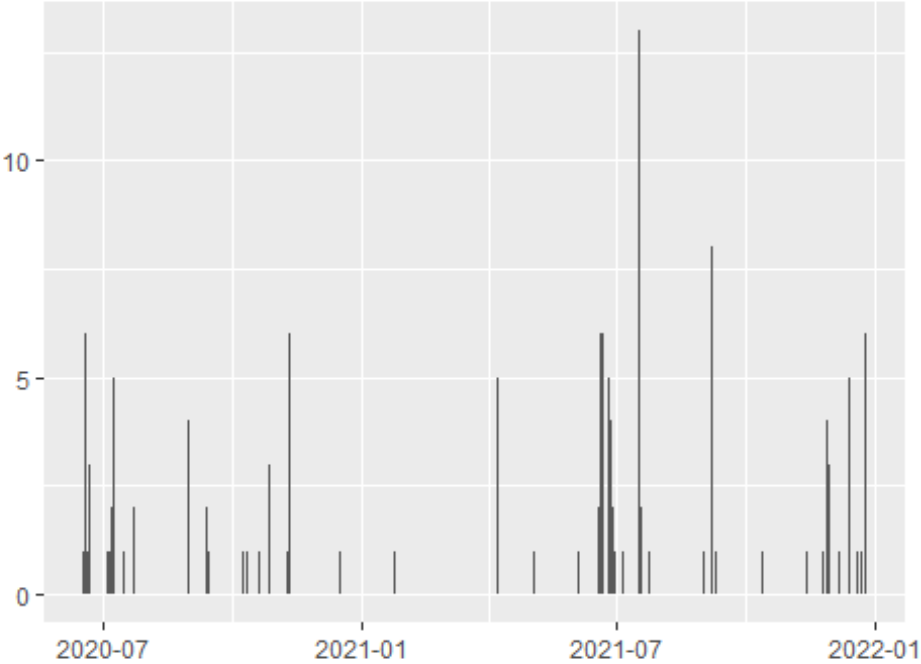

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
chat_data <- rwa_read("C:\\Users\\HP\\Desktop\\practice\\whatsapp_chat.txt")
%>%
  filter(!is.na(author))
```

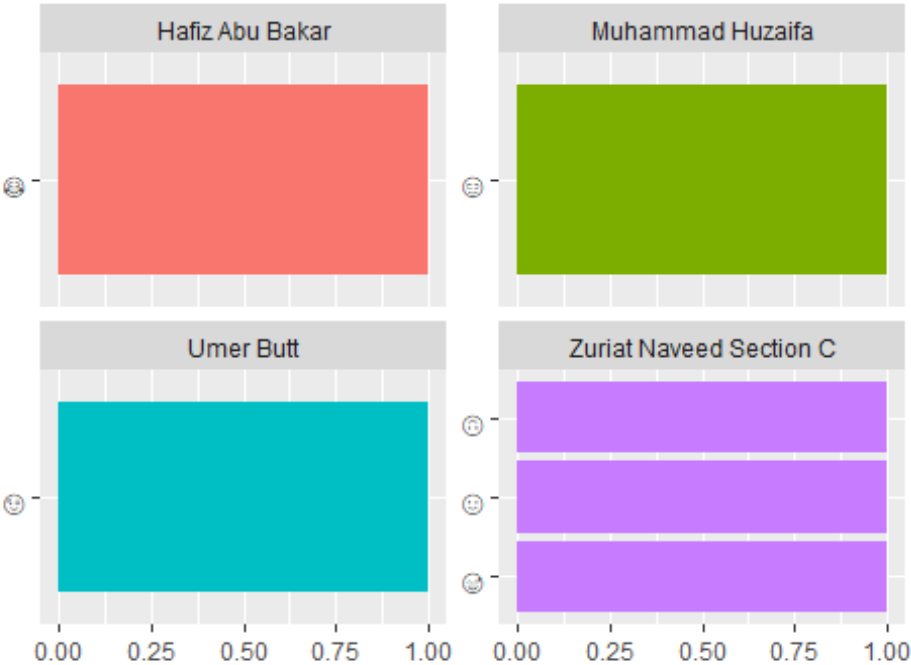

## Including Plots

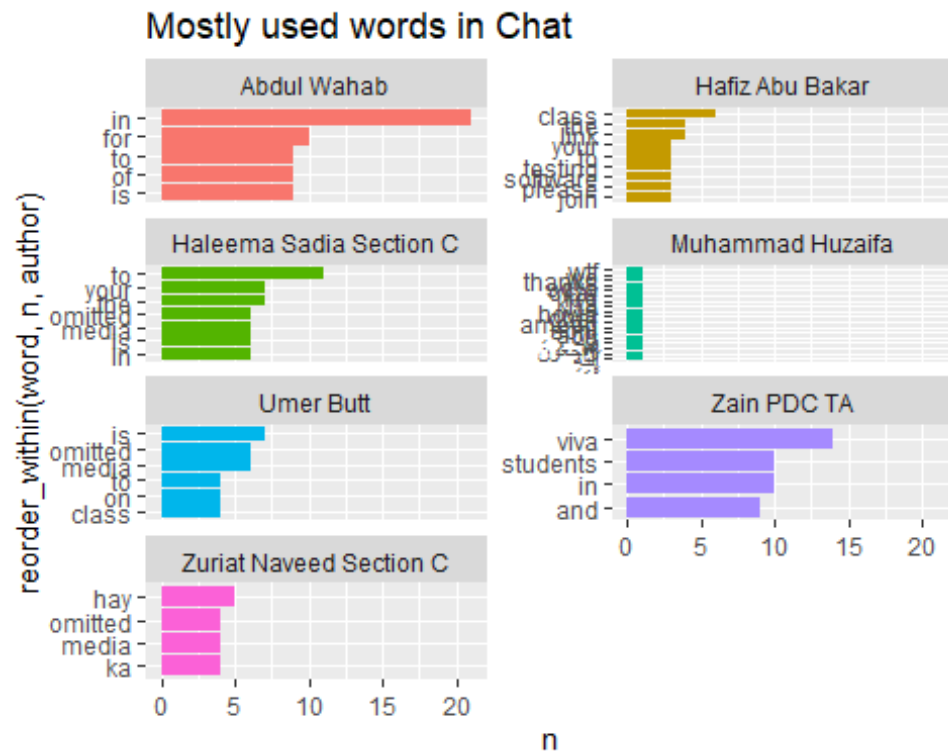

You can also embed plots, for example:

Number of messages with respect to days

Mostly used emojis in Chat

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
